

15 Matching questions

1. _____ Expression
 2. _____ inverse operations
 3. _____ Metric system
 4. _____ dimensional analysis
 5. _____ Conversion Factor
 6. _____ rate
 7. _____ Term
 8. _____ Polynomial
 9. _____ Unit Conversion
 10. _____ Unit of measure
 11. _____ converting units
 12. _____ Equation
 13. _____ ratio
 14. _____ Imperial (English) system
 15. _____ unit rate
- A. A ratio that compares two quantities measured in different units
 - B. numbers and/or variables separated by + or - signs that make up a mathematical expression.
 - C. a system of measurement based on the number 10. Standard for science everywhere.
 - D. A mathematical expression that contains an equals sign.
 - E. Measurements using feet, inches and pounds. Standard in the U.S. and Great Britain.
 - F. A comparison of two quantities by division
 - G. converting from one unit of measurement of another by using a converting factor
 - H. A rate with a denominator of 1.
 - I. A standard quantity of something - size, length, weight, volume, time, etc.
 - J. The process of changing one unit of measure to another.
 - K. A way to analyze and solve problems using the units, or dimensions, of the measurements
 - L. A mathematical phrase that contains operations, numbers, and/or variables.
 - M. Two operations that undo each other
 - N. 2. An arithmetical multiplier for converting a quantity expressed in one set of units into an equivalent expressed in another
 - O. A math expression made up of terms separated by + or - signs.
